SCIENTIFIC CENTER AND RESEARCH

The Italian Society of Cardiology (SIC) conducts high quality scientific research on the cardiovascular system, aimed at improving the quality of care for patients. The SIC’s mission is to blend tradition with innovation, fostering the advancement of knowledge and the development of new treatments.

SIC TIEBRONE

The SIC TIEBRONE (Italian Cardiology Tribune) is a scientific journal that publishes original research articles, reviews, and commentaries on all aspects of cardiology.

REGIONAL SCIENTIFIC FEDERATION

The Regional Scientific Federations of the Italian Society of Cardiology (SIC) are organizations that bring together cardiologists in each region of Italy. They are responsible for promoting scientific research, education, and patient care within their region.

WORKING GROUPS

The Italian Society of Cardiology (SIC) has several working groups that focus on specific areas of cardiology. These groups are responsible for developing guidelines, conducting research, and organizing educational events.

EDUCATIONAL AND TEACHING MISSION

The Italian Society of Cardiology (SIC) is committed to promoting education and teaching in cardiology. They offer a range of educational opportunities for healthcare professionals, including courses, workshops, and webinars.

ITALIAN FOUNDATION HEART AND CIRCULATION

The Italian Foundation for the Prevention of Heart and Circulation Diseases (ITALIAN FOUNDATION HEART) is a non-profit organization that works to raise awareness about heart and circulatory diseases and their prevention.

ITALIAN SOCIETY OF CARDIOLOGY

The Italian Society of Cardiology (SIC) is a professional association of cardiologists in Italy. It was founded in 2002 and is dedicated to promoting excellence in cardiology through clinical practice, teaching, and research.

SIC PATIENT CARE

The Italian Society of Cardiology (SIC) is committed to providing high-quality patient care. They offer a range of resources for patients, including educational materials, patient support groups, and a patient service directory.
We should get all these ambitions targets always keeping a synergic but ethical partnership with Pharmaceutics and Industry who both can contribute to this changing process of the academic Italian cardiology who must play an important role in this moment so crucial for our activities.

7. To actively participate to the different programs of ESC.
6. To face the reduced economic availabilities for scientific Congresses and research grants, to improve our effort in the field of cultural activities like the diffusion of scientific news, also enjoying the beautiful city of Rome just few weeks before Christmas.
5. To harmonize activities of other Scientific Associations interested in the field of Cardiology and to interact with the international cardiology societies, namely the Italian Society of Cardiology and to work together with the American College of Cardiology, that will contribute with outstanding speakers.
4. To organize Scientific events at the regional level and to prepare a common, unified policy for the promotion of:
   - professional continuing education programs;
   - standards and diagnostic/therapeutic guidelines;
   - disease prevention;
   - research in any institutional activity, according to Italian law.

The annual meeting of the Italian Society of Cardiology takes place in Rome from December 13 through December 15, 2014 in the traditional venue of Rome Cavalieri hotel; an attractive Program for the National Congress which will be held on 13 – 15 December 2014 at the Rome Cavalieri Hotel; it is my pleasure to give some information on scientific activities of the Italian Society of Cardiology and of the Scientific Associations interested in the field of Cardiology which work together with the Italian Federation of Cardiology.

The ITALIAN FEDERATION OF CARDIOLOGY

The primary role of the IFC aims at representing in Europe the Italian cardiology society and its working groups to the interests for any national cardiology association which work together with the Italian Federation of Cardiology to meet and to host all European Cardiologists who want to be updated with the latest results of clinical and experimental trials which have direct impact for the prevention, diagnosis and treatment of cardiovascular diseases.

The scientific program will gather the contribution of our working groups and regional sections through national and international speakers that will present their research activities in several poster and oral presentations.
